

Esraa Syam

Software Engineer

+201016776619 | esraasyam15@gmail.com | EsraaSyam | esraasyam | Damietta, Egypt

Education

Faculty of Computers and Informatics, Suez Canal University

Bachelor's Degree in Computer Science

Ismailia, Egypt

2020 - 2024 | GPA: 3.20

- **Graduation Project Grade:** Excellent
- **Relevant Coursework :** Data Structures, Algorithms, OOP, Web Development, Databases, Operating Systems, Networks

Experience

ATHR

Software Engineer Intern

On Site

Dec 2024 - Feb 2025

- Developed the backend of the ATHR Shares App using NestJS and PostgreSQL, and implemented over 30 API endpoints.
- Designed the system architecture by preparing the SRS (Software Requirements Specification) document in collaboration with team leader.
- Created the ERD (Entity-Relationship Diagram) and designed the database schema to support the app's functionality.
- Integrated APIs with the Flutter team to ensure smooth data communication.
- Participated in regular team discussions and applied feedback to improve code quality and system design.

Projects

HealthCare+ — Healthcare System

Graduation Project

Remote

Oct 2023 - Jul 2024

- Led a team of 7 developers, managing task distribution and ensuring smooth collaboration using Agile practices.
- Built a robust backend with Node.js and Express, delivering 35+ RESTful APIs for both web and mobile clients.
- Designed and implemented 6+ database schemas with Mongoose, focusing on scalability and data consistency.
- Contributed to API reliability through proper validation, error handling, and structured response design.

Moodify — Emotion Tracking App

Side Project

Remote

Sep 2025 - Oct 2025

- Built a structured backend with NestJS and PostgreSQL using a modular, feature-based architecture.
- Focused on database performance by creating composite indexes and optimizing queries for analytics.
- Containerized the project with Docker to ensure consistent development and deployment.
- Followed clean architecture principles to keep the codebase scalable and maintainable.

OpenLearn — E-Learning Platform

Side Project

Remote

Feb 2025 - Apr 2025

- Engineered a backend for an e-learning platform with 15+ secure endpoints using NestJS and PostgreSQL.
- Integrated OAuth authentication for secure user login and access to third-party services.
- Connected Dropbox API for smooth file and image uploads with secure cloud storage.
- Deployed the entire system on Railway, ensuring reliability and scalability.

Skills

Languages:

JavaScript, TypeScript, Python, Java, C++, SQL, HTML, CSS, Bash

Frameworks & Tools:

Node.js, Express.js, NestJS, TypeORM, Mongoose, PostgreSQL, MongoDB, Docker, Git, Linux, Postman

Concepts:

RESTful APIs, OOP, Data Structures, Algorithms, Authentication & Authorization, Agile

Achievements

Programming Competitions

- Qualified for the national programming contest in Egypt (ECPC) after ranking 5th at the university. 2023 – 2024
- Achieved 9th place in the national ECPC Qualification Contest. 2022 – 2023

Volunteer Experience

ICPC Suez Canal University Community

Mentor

Remote

2022 – 2023

- Mentored over 300 students on algorithmic problem-solving, helping them strengthen their logic and efficiency in competitive programming.
- Led weekly sessions introducing advanced topics and practical problem-solving strategies.

GitHub

Google Developer Student Clubs — EELU

IT Instructor

Remote

2022 – 2023

- Delivered online C++ training sessions to over 250 students, focusing on building strong programming fundamentals.
- Designed hands-on exercises and quizzes to enhance students' problem-solving and logical thinking skills.
